Rust Inhibitor**

Provides Long Term Rust Protection on Metal Surfaces

HE&M Saw Rust Inhibitor 106 is a PREMIUM, Special Blend corrosion inhibitor, formulated for long term rust protection on metal surfaces (25+ days humidity cabinet). It can be used for indoor & outdoor protection with up to one year indoor protection provided.

Application of the HE&M Rust Inhibitor 106 is easy. It can be sprayed, rolled, brushed, or dipped. It is a proven, outstanding water displacing and non-staining corrosion inhibitor which will rapidly separate water, displaced from metal surfaces after machining operations or after alkali cleaning.

Upon evaporation of the dilutents in the HE&M Saw Rust Inhibitor 106, the resulting film is highly resistant to salt water, salt spray, water, and humidity. This ultra thin film is effective in the protection of ferrous and non-ferrous metals from atmospheric corrosion even under conditions of high humidity

Does Not Cause Dermatitis

When needed, removal of the Rust Inhibitor 106's protective film is easy with alkaline or solvent cleaners. It does not promote dermatitis, promoting a high level of operator acceptance.

Specially Formulated for Sawing

THIS PRODUCT IS NOT SOLUBLE.

PHYSICAL & CHEMICAL PROPERTIES

Flash Point	109° F (COC)
Appearance	Amber Liquid
Odor	mild/solvent
Hazardous Components	Yes
